EDUCATION

University of California, Berkeley

Master of Engineering in Visual Computing and Computer Graphics

August 2025 – May 2026

- MEng Fung Excellence Award
- Relevant Coursework: Theory and Applications of Virtual Reality and Immersive Computing

University of California, San Diego

Bachelor of Science in Computer Science, Minor in Business

September 2021 – March 2025

- Grades: 3.8/4.0 GPA, Provost Honors, Shores Scholarship
- Relevant Coursework: Computer Graphics II: Rendering, Computer Vision, Computer Animation, Machine Learning: Learning Algorithms, Advanced Software Engineering

EXPERIENCE

Amazon

Seattle, WA

Software Development Engineer Intern | *AWS, Java, Typescript, React*

May 2025 – July 2025

- Designed and implemented a targeting service to segment sellers, aiming to reduce 45,000+ annual hours spent on manual segment list creation.
- Built and deployed scalable backend systems using AWS services including OpenSearch Service, DynamoDB, S3, ECS, and EC2.
- Collaborated cross-functionally to integrate the service into internal workflows while maintaining security and operational best practices.

Robolink

San Diego, CA

Software Engineer Intern | *Python, JavaScript, React, HTML, CSS*

June 2024 – February 2025

- Launched and enhanced Robolink's Web Python editor using React Pyodide: Identifying and resolving critical issues, improving functionality and user experience, contributing to a successful launch.
- Tested and implemented improvements for drone systems: Conducting comprehensive testing on drones, fixing software bugs, and developing a new dashboard system to streamline classroom learning management and enhance educational experiences.
- Streamlined the development pipeline from coding and testing to deploying new features, ensuring consistent performance improvements and maintaining high-quality standards across the software.

University of California, San Diego Center for Visual Computing

San Diego, CA

Undergraduate Research Assistant | *C++, Python, OpenCV, Spinnaker SDK*

January 2024 – June 2024

- Assisted in visual reconstruction research by developing/optimizing imaging algorithms and testing FLIR Blackfly S camera software, significantly improving image quality.
- Calibrated advanced imaging equipment and managed complex setups to ensure experimental accuracy and efficient data collection.

PROJECTS

Virtual Reality Based Learning Environment

C#, Unity, OpenXR

September 2025 – Present

- Collaborating in a team of three MEng students for UC Berkeley's MSE 45 course, advised by Professor Jie Yao, to develop 3+ interactive VR lab modules on Meta Quest 3s, impacting 50+ students.
- Architecting the project for a future open-source release, creating a scalable framework for other universities to adopt and adapt the VR learning modules.

TECHNICAL SKILLS

Programming Languages: Java, Python, C/C++/C#, JavaScript, Typescript, HTML/CSS, Bootstrap, Markdown, SQLite, React, Sass, Redux, Smithy

Developer Tools: Atom, Git, GitHub, Copilot, Visual Studio, VS Code, Vim, Jupyter Notebook, Android Studio, Figma, Unity, Pandas, OpenGL

Concepts: Object-Oriented Programming, Software Design Patterns, and Algorithm, Agile Software Development, AWS, CI/CD

Software: Asana, Jira, GitHub Projects, Slack, Google Workspace, Microsoft Office, WordPress
